

Inspiration

At what point does the human body begin to suffer from frostbite? This is what your mind thinks when you're barreling down a black diamond in the Rockies in nothing but your bathing suit and your favorite set of powder skis. I should have still been lounging in the hot tub with Annalise as the snow came down. Of course, her father should have still been away on business for at least another day.

Guess we were both in for a surprise.
